

Randy Reynolds

Maya Evelyn Reynolds' eyes are like a shining beacon of light. But without a power source, lights can dim and go out, never reaching their destination. In a constantly evolving global world, knowledge is the only answer. Knowledge is power. Education is the source. As a 4th Generation Coloradoan, who was not able to attend college every generation in my family has gone one small step further, than the previous generation. I'm applying for this scholarship in the hopes that Maya 6th generation, with her crystal, radiant eyes, will be given the energy source... to meet the challenges that her generation has ahead of them. I see her parents providing constant and daily stimulus, and I joy in the wonderful growth and curiosity that only a loved and educated child can show. Maya Evelyn Reynolds' eyes are like a shining beacon of light. What I missed out on, and cannot financially provide...that grand interchange where ideas and knowledge intersect...could continue the clarity in her eyes...helping to wipe out ignorance and bigotry...to provide sensible direction ...in our very difficult world. And maybe, just maybe, in this country that we all so love, Maya, with an energy source college for her beautiful eyes, could become the 50th president of the United States, develop the vaccination for all cancers, or be that shining light for others in her community. Maya Evelyn Reynolds' eyes are like a shining beacon of light. I ask for your assistance, in providing Maya that opportunity.
